

One platform to get paid, invoice and sell online

SaturnShift is a unified payments, invoicing and commerce platform for businesses. Customers can pay by card, ACH bank payment or USDC and USDT stablecoins through one checkout, and the business sends invoices, bills customers on a schedule and sells online from the same dashboard.

Cards and ACH bank payments

Accept credit cards, debit cards and ACH bank payments, processed through Stripe.

USDC and USDT stablecoins

Accept USDC and USDT on the same checkout. They settle on-chain, in kind, to the business's own payout wallet on the network the customer paid on, and SaturnShift never holds them.

One checkout

Customers choose how they want to pay on a single checkout page, on invoices, payment links and online orders.

Invoices and payment links

Send professional invoices and shareable payment links, with automatic email reminders before and after a payment is due.

Recurring billing

Bill memberships, retainers and subscriptions automatically with card-based subscriptions on the Full Suite plan.

Online store

Launch an AI-built online store with a hosted checkout and automatic sales-tax calculation.

WooCommerce

Add SaturnShift to an existing WordPress store with the native WooCommerce plugin.

QuickBooks Online

Payments, fees and refunds sync to QuickBooks Online on the Crypto Suite and Full Suite plans.

Why businesses use SaturnShift

- More ways for customers to pay, through one checkout
- Invoicing, payments and online selling in one dashboard
- Refunds and reporting across every payment method
- Start on the free Starter plan and upgrade as the business grows

Plans: Starter (free), Crypto Suite and Full Suite. Current pricing and fees are always on the SaturnShift pricing page. Businesses referred by a SaturnShift partner get a 30-day free trial on their first paid plan.

Businesses are reviewed and approved before they start accepting payments. Card and ACH payments are processed by Stripe, subject to its terms and eligibility requirements, and payment methods may not be available to every business. SaturnShift is a software platform, not a bank.
